Webinars: A resource for NetHope members and partners

The NetHope Solutions Center is a destination for webinars that focus on current trends that mark the intersection of technology and development. As a benefit and resource for NetHope members and partners, NetHope Solutions Center webinars are often open to the public and allow members to share case studies/best practices, and for partners to share their solutions, and subject matter experts to present on IT solution-related topics.

NetHope encourages NGOs, technology providers, and ICT4D enthusiasts to add their insight to our growing knowledge base. By featuring a diverse set of topics, the series encourages innovation and collaboration among a wide-range of professionals.

To date, NetHope has hosted more than 250 webinars. In 2019 alone, NetHope offered nearly 44 webinars to more than 6,700 participants on topics as comprehensive as digital financial inclusion and the use of technology to enable evidence-based humanitarian and conservation program design. These webinars provided opportunities for members to increase their knowledge base, discover innovations from our private sector partners, and collaborate on potential solutions utilizing the best that tech has to offer. Webinars offer a great opportunity to reach a broad constituent of technology professionals in the private and public sectors.

As the global reach of COVID-19 and acknowledgment of the impacts of travel on climate change affects more of how we all work, NetHope webinars are an even more important venue for humanitarian and conservation professionals to effectively collaborate with one another and with IT professionals in the private sector to connect and share best practices, innovative products, and essential services that can benefit us all.

NetHope empowers committed organizations to change the world through the power of technology. NetHope, a consortium of nearly 60 leading global nonprofits, unites with technology companies and funding partners to design, fund, implement, adapt, and scale innovative approaches to solve development, humanitarian, and conservation challenges. Together, the NetHope community strives to transform the world, building a platform of hope for those who receive aid and those who deliver it.

How You Can Get Involved

With a diverse topic range and the ability to share and connect with technology professionals from across the world, the NetHope Solutions Center webinar series offers visibility and an opportunity to showcase technology solutions to a cross-sector audience. Opportunities to sponsor the series are available. For more information, please contact info@nethope.org.
